Corporate Quality Manager

Subject: Supplier Approval for the Re-Lubrication of Airframe Control Bearings  
Reference: Q5101-E Supplier Audit NPB 031006; Special Process Audit NPB 031006; Clean Room Audit NPB031006 – Conducted March 10, 2006.

Dear Ms. Driscoll,

Based on an On-Site Audit of National Precision Bearings' (NPB) compliance with accredited certification ISO 9001:2000 (Cert# FM 94439) on 03/10/06, and a subsequent review of the above referenced documents, NPB has been **approved** and added to the RBC/ITB Approved Supplier List for the process of "Airframe Control Bearing Re-Lubrication", effective 03/16/06.

This approval will remain effective based on NPB's continued compliance with ISO requirements, while maintaining an acceptable quality rating on product delivered to ITB, ITB's Authorized distributors or other ITB Airframe Control Bearing divisions/customers.

Your assistance during this review period has been very much appreciated.

Sincerely,

A handwritten signature in black ink that reads 'Diran Amador'.
